Article Management System - Technical Specification & Architecture Document

1. Executive Summary & Architecture Overview

1.1 Executive Brief

The Article Management System is a REST API-based project designed to manage articles. It is built with a focus on data modeling and API design. The system is ready for execution with a health index of 100.0 and a completeness score of 100.0.

1.2 Maturity Assessment

Based on the parser metrics, the project is READY FOR EXECUTION with a health index of 100.0 and a completeness score of 100.0. There are no structural gaps or open questions, indicating a high level of maturity and readiness for implementation.

1.3 Technical Stack

- Languages and frameworks:
- Architectural constraints:

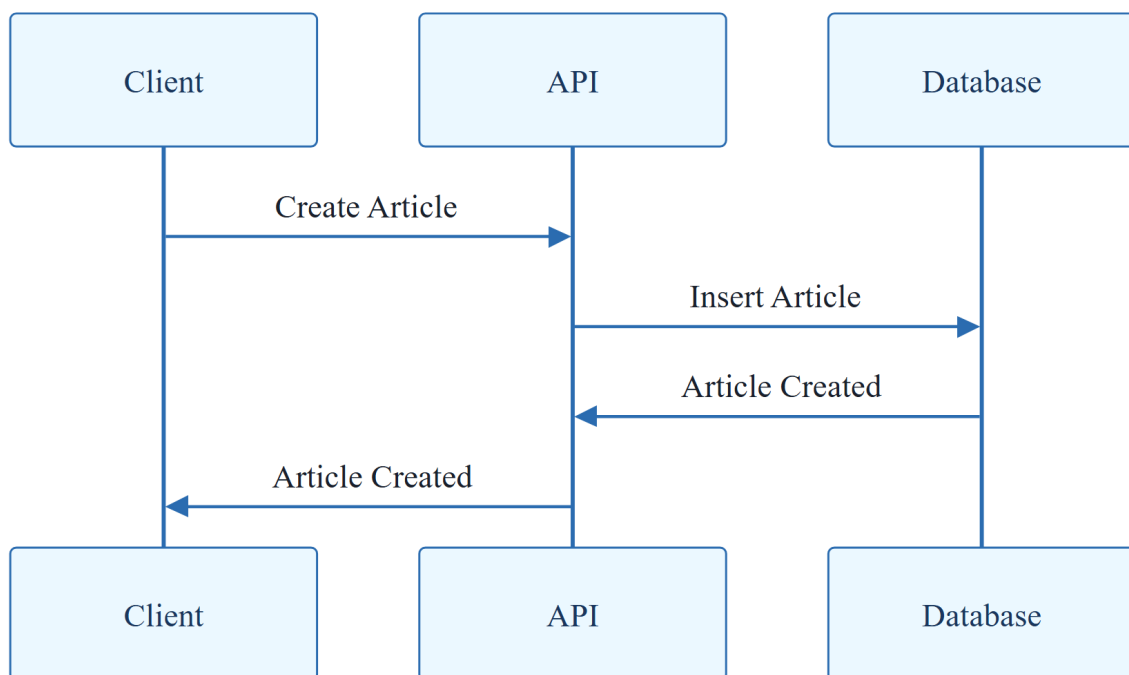

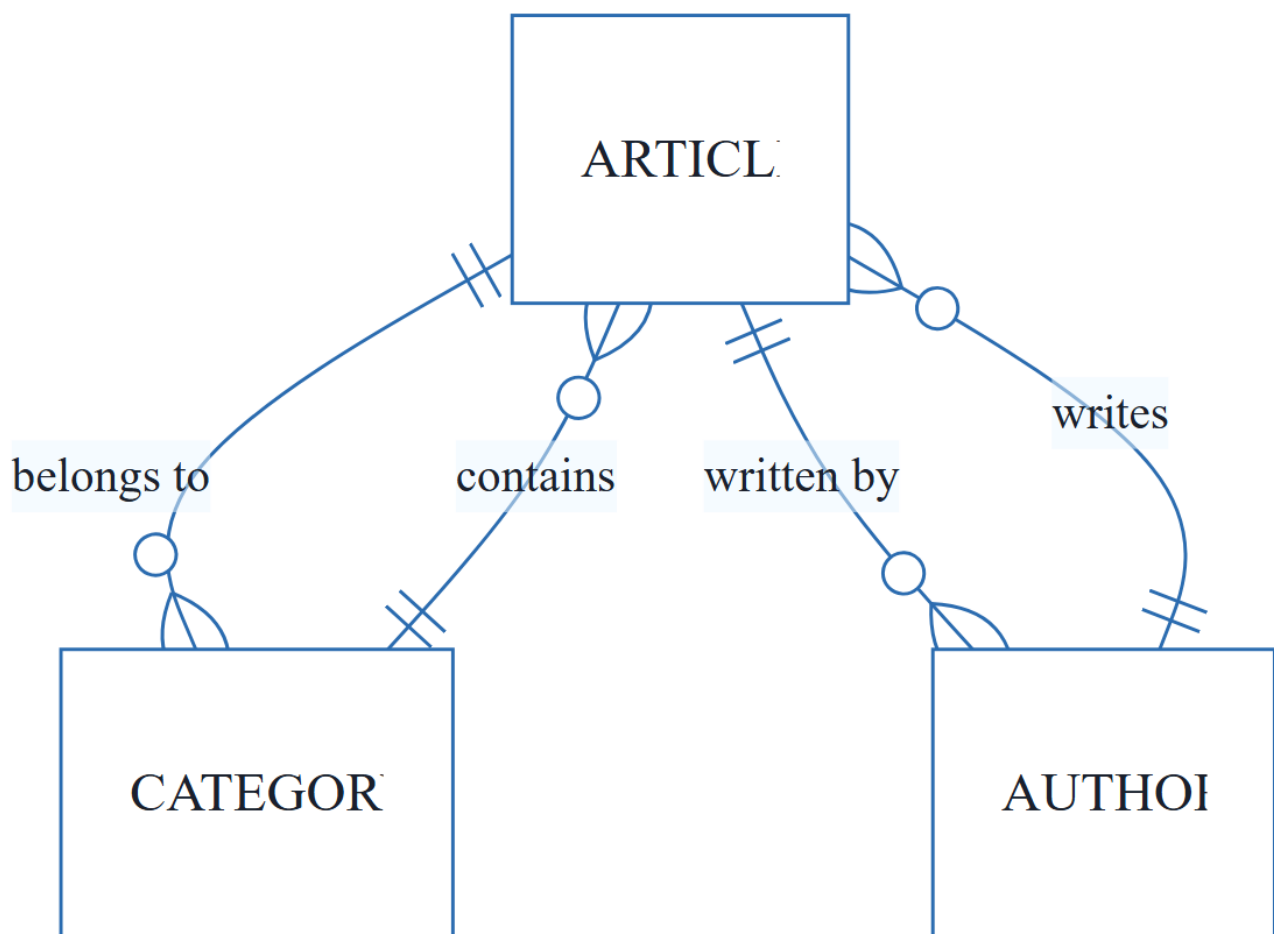

1.4 Architectural Constraints

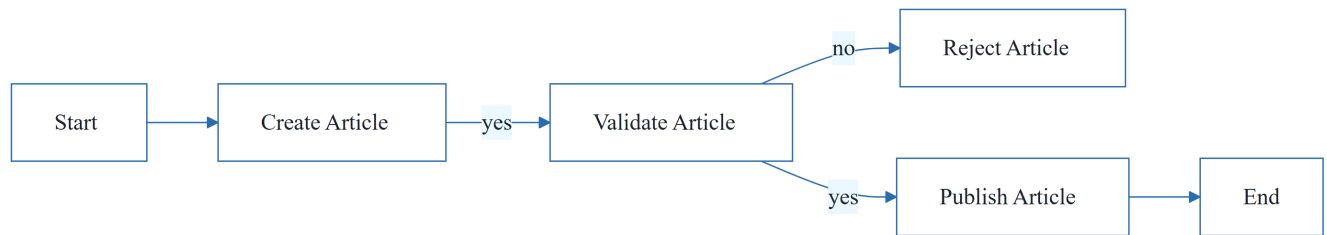

- Mode async obligatoire
- Fenêtres d'expiration JWT
- Absence de mocking DB

1.5 Critical Dependencies

- None

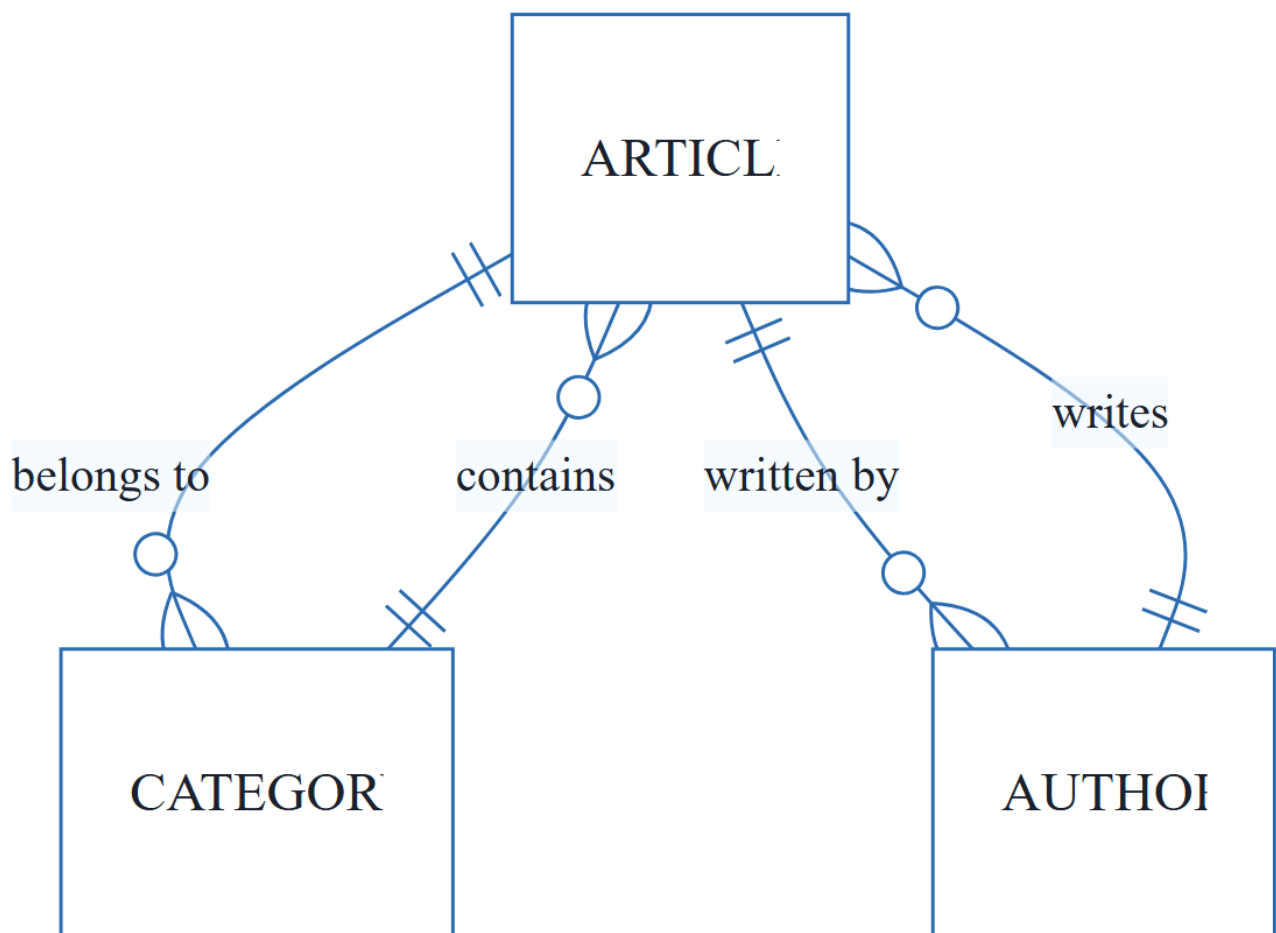

2. Architecture Workflows

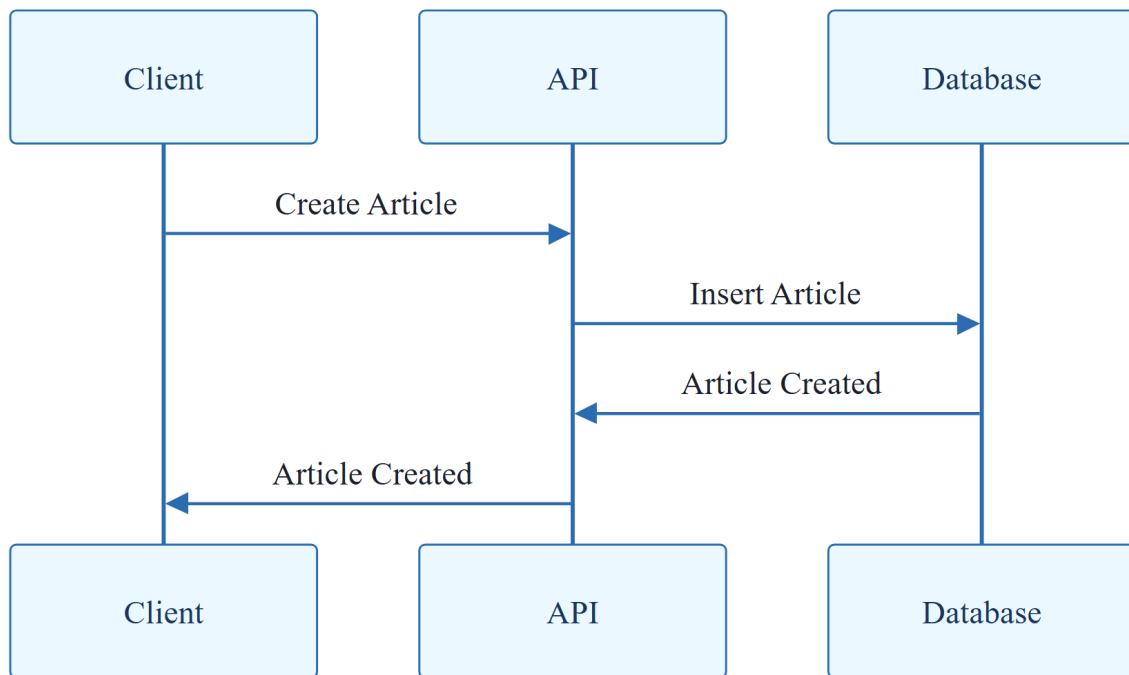

& Visual Diagrams

ER Diagram for Article Management System

Sequence Diagram for Article Management API

Traceability Flowchart for Article Management Requirements

[Schema non compile : Diagramme #7]

Workflow Flowchart for Article Management Process

[Schema non compile : Diagramme #8]

3. Detailed Technical Specifications & Business Rules

3.1 Requirements Traceability

Requirement ID	Description	Implemented By
REQ-001	Article Creation	US-001
REQ-002	Article Validation	US-002

3.2 Security Rules

- None

3.3 Data Models

- ARTICLE
- CATEGORY
- AUTHOR

4. Project Governance & Structural Gaps

4.1 Structural Gaps

- None

4.2 Remediation & Workflow

- None

5. Technical & Domain Glossary (Terminology Reference)

Term	Category	Context Anchor	Project Definition
Article	Domain	Article Management System	A piece of content managed by the system
Category	Domain	Article Management System	A classification of articles
Author	Domain	Article Management System	The creator of an article
