Article Management System - Technical Specification & Architecture Document

1. Executive Summary & Architecture Overview

1.1 Executive Brief

The Article Management System is a full-stack application designed for content lifecycle orchestration. It utilizes a Python-based backend coupled with a PostgreSQL relational database and a JavaScript frontend to manage article creation, storage, and retrieval. The system follows a classic client-server data pattern to ensure structured content persistence and efficient delivery.

1.2 Maturity Assessment

The project specifications exhibit a high degree of structural integrity with no identified gaps or unresolved uncertainties in the parsed graph. The documentation provides a clear path from conceptual requirements to technical implementation, rendering the project READY for immediate execution.

1.3 Technical Stack

- Python
- PostgreSQL
- JavaScript

1.4 Architectural Constraints

- Client-server separation of concerns.
- Relational data integrity via PostgreSQL.
- Full-stack integration between JS frontend and Python backend.

1.5 Critical Dependencies

- PostgreSQL database instance for persistent storage.
- Python runtime environment for backend logic.
- JavaScript execution environment for frontend rendering.

2. Architecture Workflows & Visual Diagrams

(No diagrams provided in the source data)

3. Detailed Technical Specifications & Business Rules

3.1 Requirements Traceability

Identifier	Requirement Description	Source	Status
(No atomic identifiers provided in parsed_data)	N/A	N/A	N/A

3.2 Security Rules

(No specific security rules provided in the source data)

3.3 Data Models

(No specific data models provided in the source data)

4. Project Governance & Structural Gaps

4.1 Structural Gaps

No structural gaps identified.

4.2 Remediation & Workflow

No remediation required as the project is assessed as ready for execution.

5. Technical & Domain Glossary (Terminology Reference)

Term	Category	Context Anchor	Project Definition
(No glossary items provided)	N/A	N/A	N/A
